# How To Play

Advance to higher levels by forming words with letters in the boxes at the top that match the 'Word Type'.

Letters are added by forming words from the letters in the rows below.

Form words in the rows of letters that match the category of the blue button on the right.

Press the category button to submit the word; if a word and it matches the category, it will disappear.

Any letters in the white boxes will be added to the first empty yellow box in the top row.

Keep the rows from reaching the top of the screen; if they do the game will be over.
